PROFESSIONAL SUMMARY

Certified Java developer currently pursuing a Master's in Computer Applications (MCA) with a solid academic background in computer science. Proficient in Java programming, Spring Boot, and related technologies. Demonstrated strong problem-solving abilities and meticulous attention to detail through completed projects and internships. Ready to leverage these skills for effective collaboration and contributions in real-world scenarios.

Certifications

Java Fullstack Developer Certification

Issued by: Jspiders, Bangalore.

Skills

- Frontend Development: **HTML, CSS, JavaScript, Bootstrap, React JS.**
- Backend Development: **Java, Spring Boot, Servlet, Hibernate.**
- Database Management: **MySQL, PLSQL.**

Education

Masters of Computer Application

RV College of Engineering, 2023-2025

Bachelors of Computer Application

Sharnbasva University, 2019-2022

Pre University

Gurukul PU College, 2016-2018

INTERNSHIP EXPERIENCE:

Giligilichoo Technologies (3 Months)

- Developed and maintained Java-based applications.
- Collaborated with the backend team to integrate APIs.
- Improved application performance by optimizing database queries.

Aller Technology (2 Months)

- Developed and maintained Java-based applications.
- Collaborated with the backend team to integrate APIs.
- Improved application performance by optimizing database queries.

PROJECTS

Spring Boot CRUD Operation

Objective: Developed a full-featured CRUD (Create, Read, Update, Delete) application using the Spring Boot framework. The project aimed to manage a database of entities efficiently with a user-friendly interface, demonstrating in-depth knowledge and application of Java, Spring Boot, and related technologies.

- Technologies Used: HTML, CSS, SpringBoot, Java, MySQL.

Air Canvas:

Objective: Created an application to draw in the air using finger movements.

- Technologies Used: Python, OpenCV, ImageProcessing.

Netflix Clone Using ReactJS

Objective: Developed a Netflix clone application using ReactJS to emulate the core features of the popular streaming platform.

- Technologies Used: ReactJS, Web Technology
