State Board(Class X)

### TECHNICAL SKILLS

Frontend: Html, css, javascript, React Js

BackEnd: Java, Springboot

Database : Oracle MySql

DevOps : Aws, git

#### Project 1: Automation System in Hospital

- The system aims to reduce manual work at the health center counters.
- The system can register different types of persons, such as employees, students, and others.
- The system can handle enquiries and complaints, reducing paperwork and file storage.

#### Project 2: Todo Full Stack Web App

- Task Tracker is a web application that aims to help users manage their tasks seamlessly.
- The app provides a clean and intuitive interface that allows users to add, track, and organize their tasks with ease.
- With Task Tracker, users can easily register different types of tasks, such as appointments, reminders, and to-do lists, and keep track of their progress.
